Population

Is Young Population An Advantage in India?

Recently there have been many articles in the newspapers saying that Indian young population is an advantage. The CNBC on 2nd November indicated that large numbers of computer programmers are around 28 years. This composition is a reflection of India's young and burgeoning working age population--a comparative age & more innovative mind.

ABC News as of 31st October also had a story on "Population bulge test India's growth aspirations", first quoted by the Minister for Human Resources development that "The burgeoning youth population" will be a dividend if we empower our young people." Then he says, it will be a disaster if we fail. India job seekers are looking for some 900 state run Job Centers across the country with very limited job available. So, is this bulge an advantage?

China Think Tank Recommend Two-Child Policy

A government think tank urging Chinese leaders to start phasing out China One-Child Policy and allows two children for every family by 2015, The China Development Foundation recommendation is a bold move. The Foundation has recommended a Two-Child Policy in some provinces from this year and by 2015 nationwide. The recommendation holds extra weight as Think Tank is under state council (China's Cabinet). The report says China has paid a huge political & social cost from one-child policy. Another report also suggests that China will have problem of ageing. The report will be released soon. – *Source: www.boston.com (31st October).*

Intimate Partners Violence & Reproductive Health

Data from survey's in India and 2007 Bangladesh Demographic Health survey suggests an association between physical partners violence and low use of antenatal care. The study indicated the associated exposure to intimate partner violence (IPV) plays a significant role is lower utilization of reproductive health service among women in Bangladesh and India, another findings suggest that preventing physical and several IPV need to be considered as an important determinants of the higher utilization of RH Care Services in Bangladesh – *Source: BMC Public Health Research Article.*
